***Election/Restrictions***

1. This action is responsive to the Amendment filed January 26, 2009, in which claims 1, 4, 8-9, 19, 21-23, 26, 28-29, 35-36, and 38 were amended and claims 39-42 were added. Claims 1-2, 4-6, 8-10, 19, 21-23, 26, 28-29, 34-36, and 38-42 are now under consideration.
2. In view of applicant's amendments and upon further consideration, applicant is now required to elect only one of the two species of disorder/environmental stimulus that have been under consideration. Particularly, it is noted that applicant was originally required (in the Election/Restriction of September 25, 2006) to elect a single species encompassed by Group I, and subsequently elected two species, pulmonary hypertension and cardiac surgery. While both species have been examined to this point as a courtesy to applicant, applicant's amendments necessitate new and different searches with respect to each of these two species, which searches will require the consideration of different and unrelated sets of prior art references. Accordingly, due to the increased burden of search and examination imposed by the present amendments, applicant is now required to elect one of the two species under consideration – either pulmonary hypertension or cardiac surgery – for further examination. **This requirement has the same basis as that which was originally imposed, but is repeated below to provide an explanation of how the species correspond to the claims currently pending. It is also noted applicant will be entitled to consideration of additional species upon allowance of a generic claim, as was indicated originally and is reiterated below.**

3. This application contains claims directed to the following patentably distinct species: the various diseases and environmental stimuli encompassed by the claims, particularly:

a) the elected species of pulmonary hypertension, now corresponding to claims 4, 19, and 21-23 in part, as well as claims 5, 35 and 40;

b) the elected species of cardiac surgery, now corresponding to claims 4 19, and 21-23 in part, as well as claims 6, 34, 36, and 41.

The species are independent or distinct because each of the species requires a different set of search terms to identify pertinent prior art, and the consideration of a different set of prior art references. Additionally, a search of more than one such disorder or stimulus would impose a serious search burden.

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 8-10, 26, 28-29, 38-39 and 42 are generic. It is noted that the generic claims will be examined with the elected species.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
